github.com/Azi2001

azi2001.pythonanywhere.com

CORE TECHNICAL SKILLS

Languages
Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries
React, Next.js, Django, FastAPI, Tailwind CSS, Vite

Databases & ORMs
PostgreSQL, SQLite, SQLAlchemy, Prisma, Django ORM

AI / Machine Learning
TensorFlow/Keras (CNN transfer learning, MobileNetV2), Ollama (local LLM integration)

Security & APIs
REST API design, JWT authentication, bcrypt password hashing, role-based access control

Tools & Deployment
Git & GitHub, Google Colab, PythonAnywhere, MS Excel

Foundations
Object-Oriented Programming, Data Structures & Algorithms, System / Database Design, Software Testing (manual test cases, automated tests with Django)

FATHIMA AZIZIA FAZAL

Software Engineering Graduate | Full-Stack & Data-Driven Development

PROFESSIONAL SUMMARY

First Class Honours graduate in Computing Science (Software Engineering), seeking a software engineering internship or junior role. Built four full-stack projects on GitHub, including a CNN-based plant disease detector, an AI job-application tracker, a resource reservation system and a food-ordering app, using Python, JavaScript/TypeScript, React, Next.js, Django, FastAPI and PostgreSQL. Brings over three years of experience in healthcare financial reconciliation and reporting, with proven accuracy, attention to detail and process discipline. Keen to apply software engineering fundamentals (algorithms, system design and testing) in a team that builds real products.

PROJECTS

GreenBuddy AI Plant Doctor

Python, FastAPI, SQLAlchemy, SQLite, TensorFlow/Keras, React, Vite, Tailwind CSS

- Trained a MobileNetV2 CNN (transfer learning) on PlantVillage images to classify 14 crops and 38 disease and healthy classes, reaching 95.6% accuracy on held-out test leaf photos.
- Added a "not a leaf" class and a confidence threshold so the app says when it is unsure instead of forcing a diagnosis.
- Built a FastAPI backend with JWT login, bcrypt password hashing and per-user scan history, plus a React dashboard that shows the disease and its treatment advice.

AI Job Tracker

React, Vite, Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Ollama

- Built a full-stack job application tracker with secure registration and login, individual user records and a dashboard of application statuses (Applied, Interview, Offer, Rejected).
- Integrated a local LLM (Ollama, Qwen 2.5 3B) to analyse uploaded PDF resumes and to match a resume against a job description, listing matched and missing skills.
- Saved each resume analysis so users can review their history, with PDF upload validation and size limits.

PrimeReserve: Resource Reservation Management System

Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Prisma, JWT, bcryptjs

- Built a reservation platform where administrators manage shared resources and staff book them, with role-based access control for Admin and Staff users.
- Implemented automatic confirmation of valid bookings and prevention of overlapping reservations for the same resource and time slot.
- Secured sessions with JWT stored in HTTP cookies and bcrypt password hashing; reservations are cancelled without deleting their records.

Craving Night (live demo)

Python, Django, SQLite, HTML/CSS, WhiteNoise, deployed on PythonAnywhere

- Built a late-night food ordering app with category filters, search, a session-based cart with quantity controls, a 10% discount on large orders and cash-on-delivery checkout with input validation.
- Added a private order-tracking page with a status progress bar, and an admin dashboard where the owner updates order statuses.
- Wrote automated tests for the cart, checkout and search logic, and deployed the app with environment-based configuration instead of hard-coded secrets.

SOFT SKILLS

- Teamwork & Collaboration
- Communication
- Critical Thinking
- Problem Solving
- Adaptability & Flexibility
- Time Management

CERTIFICATIONS

AI for Business Professionals
HP LIFE (HP Foundation), 2026

Data Science & Analytics
HP LIFE (HP Foundation), 2026

PROFESSIONAL EXPERIENCE

Operations Analyst (RCM) | Invent Health Matics Inc

March 2025 – February 2026

- Managed end-to-end payment posting, financial adjustments, audits and reconciliations, protecting data integrity within strict compliance deadlines.
- Prepared and analysed invoice and reconciliation reports, identifying discrepancies and driving corrective action to keep records accurate.
- Maintained accurate financial records under tight turnaround requirements.

Payment Posting Executive | RCM Medi Gain Colombo Pvt Ltd

June 2022 – December 2024

- Posted transactions in the Practice Management System (PMS) and maintained detailed trackers, ensuring consistent data accuracy across high-volume records.
- Prepared reconciliation and production reports used by cross-functional teams to monitor performance and resolve payment discrepancies.
- Coordinated with internal teams to troubleshoot and resolve data discrepancies through root-cause analysis.

EDUCATION

BSc (Hons) in Computing Science — Software Engineering

Kingston University London (studied at ESOFT, Colombo) | Jan 2025 – Dec 2025 | **First Class Honours**

Pearson BTEC HND in Software Engineering

ESOFT, Colombo | 2022 – 2024 | Successfully Completed

G.C.E. Advanced Level — Physical Science Stream

St. Paul's Girls' School, Colombo | 2020 | Mathematics: C, Chemistry: C, Physics: S, General English: A

G.C.E. Ordinary Level

All Saints' College, Colombo | 2017 | 8 A's, 1 B
